Special Instructions

---

* Not available for SlimTip Titanium AV and CROS Tip   ** Not available for SlimTip Titanium AV   *** Not available for SlimTip Silicone
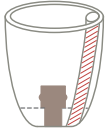

Additional Information

Acoustically Optimized Vent (AOV)
We recommend to select AOV. We will set the correct vent diameter and style consider audiogram / shell geometry / feedback canceler and required low frequency gain. The patient's audiogram is mandatory for the calculation of the AOV.
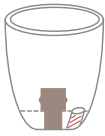

Vent styles
We offer two vent options for SlimTips.

Regular:
- Classic vent solution
- Fixed diameter (not enlargeable)

Cavity:
- Optimized for best fitrate
- Easy to enlarge by the fitter

Tube length
Measure the tube length to select the correct SlimTube. Measure both ears for binaural fitting.

Wax Systems

The following wax systems are used for different types of SlimTip/CROS Tip.

SlimTip Acrylic	CeruStop mounted in SlimTip*
SlimTip Silicone	CeruStop in receiver
SlimTip Titanium AV	HF3 mounted in ActiveVent receiver
CROS Tip	No wax filter needed

* CeruStop from receiver must be removed

SlimTip Titanium AV
This variant of the SlimTip is designed for ActiveVent™ (AV) and is compatible to the MAV receiver (MAV = Medium ActiveVent) only. There is no additional vent option needed. It is offered in durable Titanium to maximize fitrate and increase comfort.

Our SlimTip Link AV connector makes the assembly of the MAV Receiver simple and easy.

ActiveVent is compatible to Infinio rechargeable RIC hearing aids.

Extra Retention Surface (ERS)
We offer a rougher surface for Titanium. The extra retention surface can improve retention in the ear.

Hearing instrument compatibility
The SlimTip 6.0 portfolio is compatible to Infinio hearings aids or newer. It is not backward compatible to Lumity or earlier generation hearing aids.

Color codes

Code	Color
